

# **Library Management System**

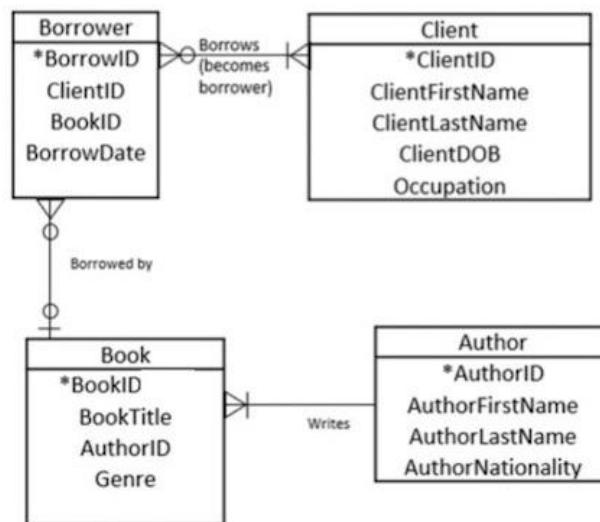

## **Objective**

In this project you will build a database for a public library. This database is aimed to collect and analyze information about the clients' reading interests. The project concentrates only on books and the clients' interests in books. The analyses that will result from this project will be used by the library's management to decide on the future purchasing policy.

## **Data Generation**

For populating this database we will use the Study.com's data which is given for the Computer Science 204 class. You can find this data at the end of the project.

## **Table Relationships**

## **Questions**

1. Display all contents of the Clients table
2. First names, last names, ages and occupations of all clients
3. First and last names of clients that borrowed books in March 2018
4. First and last names of the top 5 authors clients borrowed in 2017
5. Nationalities of the least 5 authors that clients borrowed during the years 2015-2017
6. The book that was most borrowed during the years 2015-2017
7. Top borrowed genres for client born in years 1970-1980
8. Top 5 occupations that borrowed the most in 2016
9. Average number of borrowed books by job title
10. Create a VIEW and display the titles that were borrowed by at least 20% of clients
11. The top month of borrows in 2017
12. Average number of borrows by age
13. The oldest and the youngest clients of the library
14. First and last names of authors that wrote books in more than one genre

## Answers

**1)**

```
SELECT * FROM Client;
```

**2)**

```
SELECT
```

```
ClientFirstName,
```

```
ClientLastName,
```

```
YEAR(NOW()) - ClientDOB AS Age,
```

```
Occupation
```

```
FROM
```

```
Client;
```

**3)**

```
SELECT DISTINCT
```

```
